INDEX OF VOLUME IV

Albert, A. A. *On simple alternative rings*, 129
Ayoub, C. W. *A theory of normal chains*, 162

Bassali, W. A. *See* Stevenson and Bassali
Beatty, S. and Lane, N. D. *A symmetric proof of the Riemann-Roch theorem, and a new form of the unit theorem*, 136
Berman, G. *Finite projective geometries*, 302

Davenport, H. and Erdös, P. *Note on normal decimals*, 58
Dirac, G. A. *Map-colour theorems*, 480
Duff, G. F. D. *F-equation Fourier transforms*, 248
Duncan, D. G. *On D. E. Littlewood's algebra of S-functions*, 504
Du Val, P. *On surfaces whose canonical system is hyperelliptic*, 204

Erdös, P. *See* Davenport and Erdös

Faircloth, O. B. *On the number of solutions of some general types of equations in a finite field*, 343
Feld, J. M. *On the geometry of lineal elements on a sphere, Euclidean kinematics, and elliptic geometry*, 93
Fox, C. *Iterated transforms*, 149
Frucht, R. *A one-regular graph of degree three*, 240

Gans, D. *Axioms for elliptic geometry*, 81
Gelbaum, B. R. and Kalisch, G. K. *Measure in semigroups*, 396
Glover, I. E. *Analytic functions with an irregular linearly measurable set of singular points*, 424
Goldhaber, J. K. *The homomorphic mapping of certain matric algebras onto rings of diagonal matrices*, 31
Graves, R. E. *A closure criterion for orthogonal functions*, 198

Haimo, F. *Groups with a certain condition on conjugates*, 369
Halperin, I. *The supremum of a family of additive functions*, 463
Hoffman, A. J. *Cyclic affine planes*, 295

Jones, B. W. *An extension of Meyer's theorem on indefinite ternary quadratic forms*, 120

Kalisch, G. K. *See* Gelbaum and Kalisch
Karush, W. *Isoperimetric problems in the calculus of variations*, 257
——— *The index of an extremal arc*, 281

Lane, N. D. *See* Beatty and Lane
Lorentz, G. G. *Multiply subadditive functions*, 455

Mann, H. B. *On products of sets of group elements*, 64
——— *Some theorems on difference sets*, 222
Minakshisundaram, S. *Zeta functions on the unitary sphere*, 26
Moór, A. *Quelques remarques sur la généralisation du scalaire de courbure et du scalaire principal*, 189
Murdoch, D. C. *Contributions to noncommutative ideal theory*, 43

Osima, M. *On the irreducible representations of the symmetric group*, 381

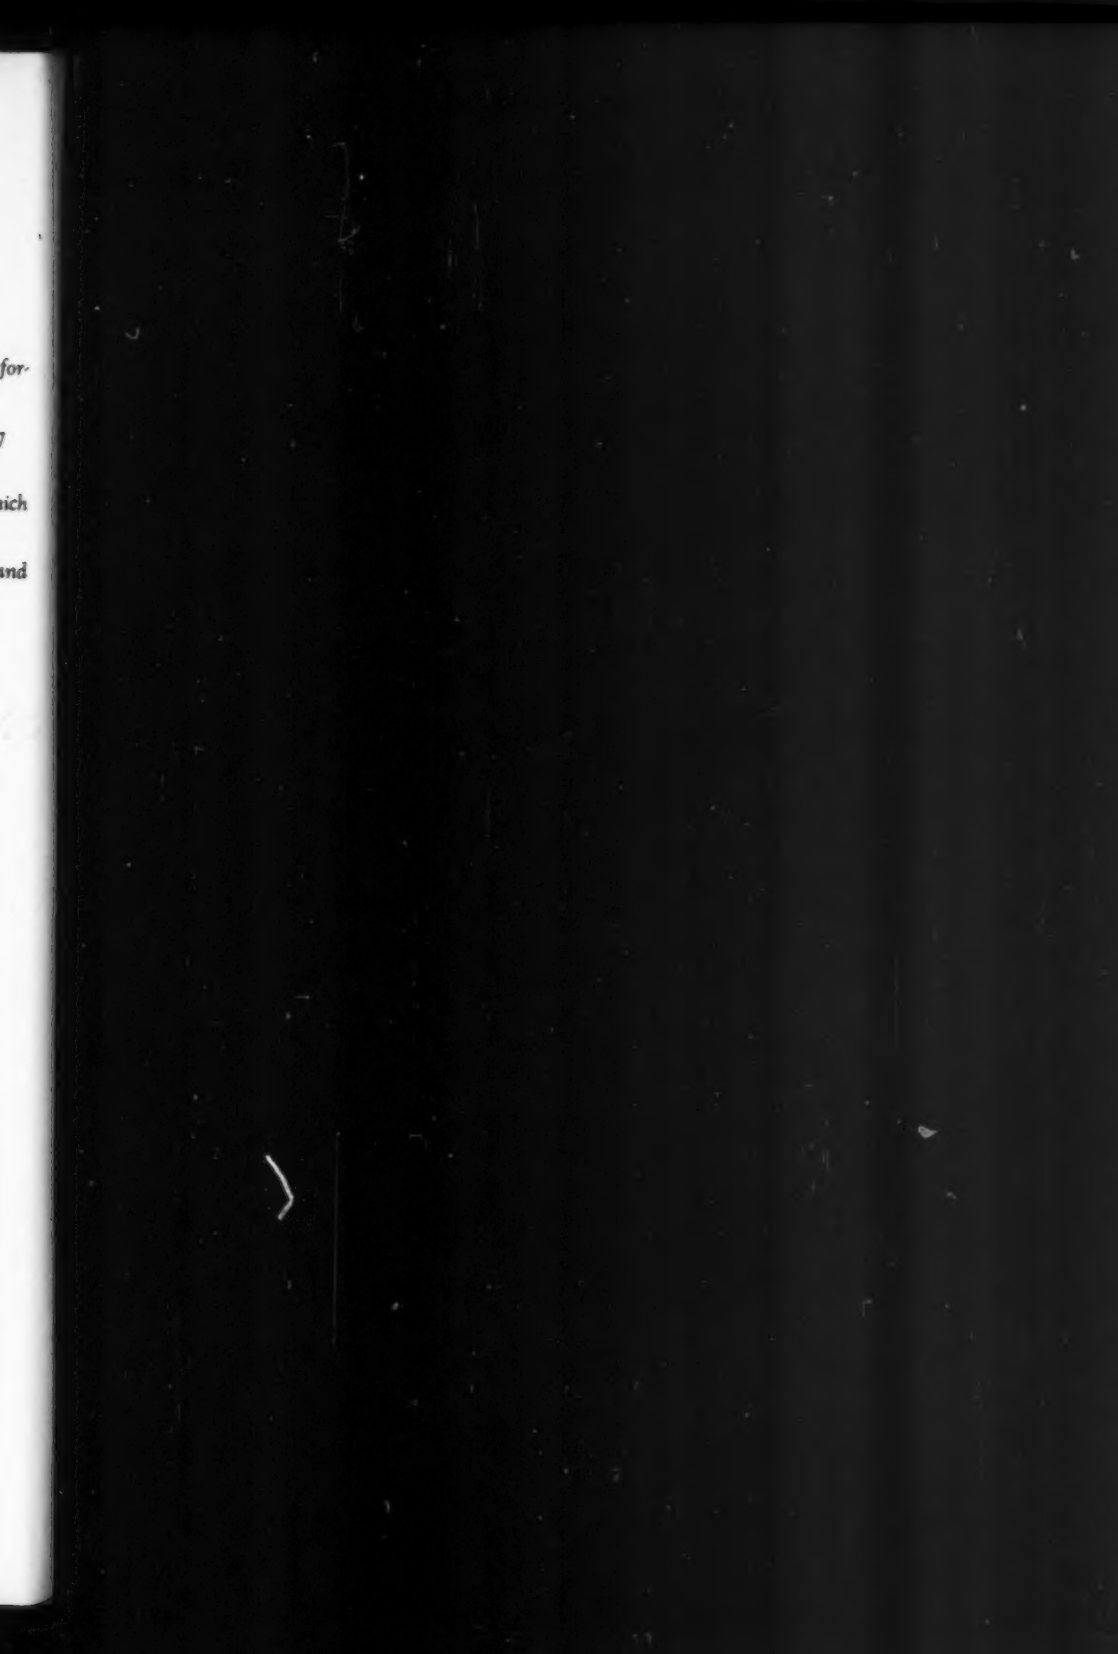
Petersen, G. M. *A note on divergent series*, 445

Ramanathan, K. G. *Abelian quadratic forms*, 352
Robertson, M. S. *A coefficient problem for functions regular in an annulus*, 407
Robinson, G. de B. *On a conjecture by J. H. Chung*, 373
Rooney, P. G. *A new representation and inversion theory for the Laplace transformation*, 436
Rothberger, F. *On the property C and a problem of Hausdorff*, 111
——— *A remark on the existence of a denumerable base for a family of functions*, 117

Simons, W. H. *The Fourier coefficients of the modular function* $\lambda(\tau)$, 67
Stevenson, A. F. and Bassali, W. A. *On the possible forms of differential equation which can be factorized by the Schrödinger-Infeld method*, 385

Thrall, R. M. *On a Galois connection between algebras of linear transformations and lattices of subspaces of a vector space*, 227
Touchard, J. *Sur un problème de configurations et sur les fractions continues*, 2
Tutte, W. T. *The factors of graphs*, 314

Val, P. Du. *See* Du Val

White, P. A. *Some characterizations of generalized manifolds with boundaries*, 329


Zemmer, J. L., Jr. *On the subalgebras of finite division algebras*, 491
